Professional Summary

Highly motivated candidate equipped to support safety and security of people and property. Experienced in assessing and resolving complex security issues. Proven ability to maintain a professional demeanor under pressure and take swift action in emergency scenarios.

Experience

Cyber Security Intern, Rednox Technologies June 2025 – July 2025
Bangalore, Karnataka

- Assisted with vulnerability assessment and patch management for client infrastructure.
- Performed regular log monitoring using SIEM tools like Splunk to identify threats.
- Helped write threat intelligence reports and escalate incidents during blue team exercises.

Cybersecurity Analyst Job Simulation, Tata Consultancy Services July 2025
Remote

- Completed simulation covering Identity and Access Management (IAM).
- Learned IAM principles, cybersecurity best practices, and business alignment.
- Delivered documentation and presentations on security solutions.

Education

Bachelor of Science (B.Sc.) in Computer Science with Cyber Security Expected May 2026
Rathinam College of Arts and Science, Coimbatore

Skills

Core Skills: Vulnerability assessment, Network security, Penetration testing, Security awareness training, Log analysis, Threat intelligence, Operating system security

Tools & Technologies: Python, SIEM (Splunk), Cryptography, Access control, DLP, IT Risk Management, Two-factor authentication, Database Security

Projects

Passmatic – Password Manager [abhijithmr226/Passmatic]
Developed a cross-platform password manager using **Python, Tkinter**, implementing **AES encryption** and secure password generation. Improved password hygiene for 20+ testers.

Safe Encrypter and Decrypter – Web App [abhijithmr226/SecureEncrypterDecrypter]
Built a browser-based encryption tool using **JavaScript, HTML** and **AES encryption**, enabling users to securely exchange data and files across formats.

Nmap by Ash – GUI for Nmap [abhijithmr226/Nmap-by-Ash]
Created a GUI-based tool using **Python, PyQt6** to simplify network scanning. Integrated OS detection, port scanning, and exportable reporting features for beginners.

ReconX – Web Recon Tool [abhijithmr226/ReconX]
Designed a reconnaissance automation tool in **Python** for subdomain enumeration, directory brute-forcing, and screenshot capturing. Tested on 30+ live domains.

Certifications

Google Cybersecurity Professional Certificate

ServiceNow IT Leadership Certificate

Career Essentials in Cybersecurity by Microsoft/LinkedIn
