PROFILE

Computer Science graduate and front-end developer focused on building responsive, user-friendly web applications. Strong foundation in HTML5, CSS3, JavaScript, UI/UX implementation, responsive design, WebRTC, Socket.IO, Git and GitHub. Experienced in turning ideas and designs into practical, maintainable web experiences.

SELECTED PROJECTS

Omeagle

HTML5 • CSS3 • JavaScript • WebRTC • Socket.IO

Built a real-time random video and text chat platform inspired by Omegle, with peer-to-peer video communication, real-time messaging, responsive UI and cross-browser support.

Live: omeagle.online

Krynn Tools

HTML5 • CSS3 • JavaScript

Created a browser-based productivity platform with developer tools, text utilities, file converters, calculators and AI-powered utilities, using a responsive privacy-focused interface.

Live: krynntools.online

Hotel Booking Platform

HTML5 • CSS3 • JavaScript

Designed and developed a Kerala-focused hotel discovery and booking platform with search, booking workflow, mobile-first UI and responsive layouts.

Live: hotelsnearmeinkerala.com

Hawksbill Security

HTML5 • CSS3 • JavaScript

Developed a cybersecurity company website with responsive landing pages, service sections, SEO-friendly layouts and modern accessible UI components.

Live: hawksbillsecurity.in

TECHNICAL EXPERIENCE

Independent Front-End Developer • Self-Directed Learning

Develop web projects using HTML5, CSS3, JavaScript, Git and GitHub while continuously improving responsive design, UI implementation, accessibility and coding best practices.
